About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over $10 million worth of Alberta's goods in 2000. Each profile lists the top 15 commodities Alberta exported to that country and also compares them with Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Statistics Canada's regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A).

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

Statistics Canada is the main source of information for the publication. Estimates for non-tourism ("other") service exports are based on special surveys conducted by Statistics Canada. The informational captions appearing at the top right corner of each country profile are from *World Factbook 2001*.

The term "nes" in the Country Profiles section refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, total service exports, including tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

International Market Profiles

Alberta Economic Development has developed a website, which contains a series of international market profiles intended to help Alberta businesses identify international market opportunities.

Profiles have been prepared for over 50 countries and regions, and are updated quarterly. Each profile offers an in-depth look at a country or region covering critical information on its trade and investment environment, financing availability, Alberta's current exports, and sector-specific opportunities for Alberta businesses.

The webpage can be accessed at: **www.alberta-canada.com/markets**

The Year in Review

Alberta exported $61.3 billion worth of goods and services to more than 160 countries in 2000. This total includes $55.3 billion in commodity exports and $5.9 billion in service exports. Exports of goods and services increased by 53.9% in 2000, from 1999's value of $39.8 billion.

Commodity Exports

The value of commodity exports increased very strongly by 59.9% from 1999 to a value of $55.3 billion in 2000. Of the 166 countries Alberta exported to, the top markets were the United States, Japan and China. The United States imported $49.0 billion worth of goods, Japan $1.3 billion and China $741 million.

The main causes of Alberta's rise in exports were higher commodity prices (for instance for crude oil, natural gas and refined petroleum), increased volumes of crude oil, telecommunication equipment, oil and gas field equipment and wheat, and a very strong world market. World trade growth peaked in 2000, with volumes up by more than 12%.

Regionally, Alberta's major markets were the United States, Asia and Western Europe. The United States accounted for 88.5% of total commodity exports, Asia 6.1% and Western Europe with 2.0%. Exports increased to all regions, except Africa. Exports to the United States increased by 68.5% to $49.0 billion, to Asia by 8.2% to $3.4 billion, and to Western Europe by 11.4% to $1.1 billion.

Commodity exports can be classified into three sectors, mining, primary agriculture, and manufacturing. The mining sector accounted for the majority of exports at $34.3 billion, followed by the manufacturing sector at $17.5 billion and primary agriculture at $2.7 billion. Increases occurred in all sectors, with mining up 83.9%, manufacturing up 37.2%, and primary agricultural exports up 7.6%.

Service Exports

Service exports were estimated at $5.9 billion in 2000, an increase of 13.9% over 1999. Included in this figure are almost $1.5 billion in international tourism receipts and $4.5 billion in exports of other services.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

Market Influences

Some of the factors that influenced Alberta's 2000 trade include:

- higher commodity prices, e.g. for crude oil, natural gas, natural gas liquids, petro-chemicals, wood pulp, hogs, pork, nickel and refined petroleum
- strong demand for crude oil and natural gas
- low grain and oilseed prices
- a weak US housing market
- rapid growth in global demand for telecommunication equipment
- strong US and Japanese currencies relative to the Canadian dollar
- weaker European currencies
- strongest world growth since 1984, led by the very strong US economy
- higher growth in all regions
- strong recoveries in South America and Eastern Europe
- continued weakness in Japan
- trend towards more local processing of Alberta beef cattle in the province

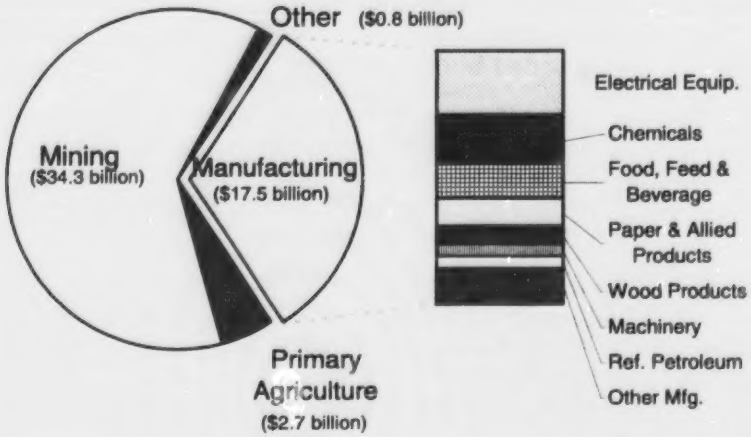
Alberta Exports by Industry and Commodity

The value of Alberta's commodity exports in 2000 was $55.3 billion, an increase of 59.9% over 1999. The increase is due largely to stronger commodity prices and increased export volumes of manufactured goods and crude oil, especially to the U.S.



Alberta's exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for $34.3 billion (61.9%) of Alberta's commodity exports. This consisted primarily of natural gas and crude petroleum at $17.4 billion and $14.9 billion, respectively. Mining exports were 83.9% higher than in 1999, primarily a result of higher prices, but also because of higher volumes.

The manufacturing sector accounted for $17.5 billion in exports, an increase of 37.2% over 1999. With the exception of wood products, which were affected by a weak U.S. housing market, each of the major sub-sectors increased in value. Strong performances were recorded in most sectors, for instance electrical/electronics equipment (up 118.7%), refined petroleum products (up 91.3%) and machinery (up 43.3%).

Primary agricultural exports totaled $2.7 billion in 2000, an increase of 7.6%. Major factors for this increase included higher exports of live cattle (up 9.8%), hogs (up 27.3%), wheat (up 17.3%), barley (up 40.0%) and forage products, such as hay and alfalfa, (up 18.6%). Grain exports rose mostly as a result of increased volumes, while oilseed exports declined because of lower prices. Cattle exports were higher as a result of higher prices, as increased slaughtering activity in Alberta led to increased beef volumes instead of a rise in the number of cattle exported.

[1] Estimate.

Agriculture, Food and Beverages

The combined export value of primary agriculture, and food and beverages (agri-foods) totaled $5.1 billion in 2000. Primary agricultural exports increased by 7.6% to $2.7 billion, and exports of food and beverages by 18.2% to $2.4 billion. The leading agri-food exports were beef products at $1.4 billion, wheat at $942 million, and cattle at $512 million.

The increase in beef exports was a result of greater demand from the United States, and increased slaughtering capacity in Alberta. Beef prices also were higher. The value of beef exports increased by 16.5%, from $1.2 billion to $1.4 billion. Pork exports rose by 67.4% to $181 million, as both prices and volumes were up sharply. Exports of prepared and preserved potatoes, mostly frozen french fries, more than doubled to $157 million.

The value of wheat and durum wheat exports increased by 11.5%, compared to 1999. Although durum wheat volumes dropped by 15%, volumes of wheat exported rose sharply by 28%. Wheat exports to Iran were up significantly, from $102 million to $172 million, making this country the top importer of Alberta wheat.

Live cattle exports rose 9.9%, because of higher prices. Exports of canola and canola products fell to $397 million and $183 million respectively, because of lower prices for canola and for canola oil.

54% of agri-food exports went to the United States ($2.8 billion), mostly in the form of beef products ($1.1 billion) and cattle ($512 million). Other major agri-food markets were Japan, Mexico and China at $634 million, $279 million and $225 million, respectively.

Mining

Mining exports in 2000 were valued at $34.3 billion compared to $18.6 billion the year before. A major factor behind this 83.9% increase was a $7.7 billion increase in the value of natural gas and a $7.1 billion increase in crude oil exports.

The 79.9% increase in the value of gas exports occurred mainly because of higher prices (up 74%), although volumes shipped also increased (up 3%). The 94.2% increase in the value of crude oil exports occurred as a result of a combination of higher prices (up 62%) and higher volumes shipped (up 20%). Petroleum gas exports more than tripled as both volumes and prices rose sharply.

Exports of coal declined by 36.1%, as both prices and volumes were lower than in 1999. The major coal markets were Japan ($170.1 million) and South Korea ($79.5 million).

TOTAL ALL MINING	**18,642,561**	**34,276,393**	**83.9%**

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. Approximately 97% was imported by the United States, while the rest was imported primarily by Japan, China, Brazil and South Korea.

Manufacturing

Manufactured exports increased by 37.2% to $17.5 billion, representing 32% of all commodity exports. Higher volumes accounted for about 75% of the $4.7 billion increase in the value of manufactured exports. Export volumes of telecommunication equipment more than doubled. Volumes of many of Alberta's other major exports such as refined petroleum, beef, petro-chemicals, and potato products, also increased strongly. Although prices for a number of commodities such as lumber, oriented strand board (o.s.b.) and canola oil declined, other commodities such as beef, pork, wood pulp, nickel, petro-chemicals and refined petroleum saw higher prices. Manufactured exports more than doubled, from a value of $8.7 billion in 1995 to $17.5 billion in 2000.

Of the 13 sub-sectors that comprise this sector all except wood products increased in value compared to 1999. Significant gains occurred in electrical and electronic products (up 118.7%), refined petroleum products (91.3%), machinery (43.3%), chemicals and chemical products (32.7%), paper and pulp (23.5%), furniture (20.6%), and construction products (20.3%). Exports of wood products declined by 14.5%, as both prices and volumes were lower in 2000.

Because the value of telecom equipment exports more than doubled, electrical and electronic products became Alberta's largest sub-sector in 2000 with exports of more than $4.5 billion. Other major sub-sectors were chemicals and chemical products ($3.4 billion), food, feed and beverages ($2.4 billion), paper and pulp ($1.9 billion) and wood products ($1.2 billion).

The major manufactured commodity exports in 2000 were telephone systems and apparatus, telecommunication transmission apparatus, wood pulp and beef products. Collectively, these accounted for 40% of all manufactured products.

Commodities contributing to the overall growth of manufactured exports were: telephone systems and apparatus (four-fold increase to $2.0 billion), transmission apparatus (up $721 million, or 65%), wood pulp (up $374 million, or 29%), petroleum oils (up $334 million, or 104%), styrene (up $264 million, or 105%) beef products (up $203 million, or 17%), and polyethylene (up $188 million, or 39%). All of these commodities were exported primarily to the United States, although China also was a large customer for Alberta's polyethylene.

A total of $13.6 billion of manufactured commodities was imported by the United States, an increase of $3.9 billion or 40.1% from 1999, mainly because of much higher exports of telecom equipment, chemicals and refined petroleum. The U.S.' largest three manufacturing sectors in 2000 were: electrical and electronic equipment ($4.2 billion), chemicals and chemical products ($2.6 billion), and food, feed and beverages ($1.8 billion). Between 1996 and 2000, the value of exports of electrical and electronic equipment to the U.S. nearly quadrupled.

Major markets in Asia included: Japan ($775.7 million), South Korea ($422.3 million), and China ($437.6 million). Manufacturing exports to Japan were up 24%, as a result of large increases for wood pulp, pork and beef. Paper and paper products, and food, feed and beverages were Alberta's largest manufacturing export sectors. Exports to China increased 42%, mostly because of a 72% increase in exports of chemicals, which account for four-fifth of China's manufactured imports. South Korean imports of manufactured goods from Alberta were 20% higher in 2000 than in the previous year, because of very large increases in wood pulp and beef imports.

Alberta's largest European markets for manufactured goods were Italy ($171.2 million), Germany ($153.2 million), and the United Kingdom ($143.4 million). For Italy the largest manufacturing import was nickel, for Germany wood pulp, and for the U.K. telecom equipment.

Mexico's manufacturing imports from Alberta rose strongly by 83% to $192.4 million in 2000, as a result of a tripling of beef imports. Chile (telecom equipment) and Venezuela (oil and gas field equipment) also had significantly higher imports of manufactured goods.

Forestry, including Wood, Paper and Allied Products

Overall, forestry product exports totaled $3.2 billion in 2000, an increase of 5.6% over 1999. Most of the gain came from a 28.8% increase in wood pulp, as a result of higher prices. Shipments of lumber and oriented strand board (o.s.b.) declined, mostly because of lower prices. The value of newsprint exports rose 1.6% because of higher prices. For all of these four commodities volumes declined slightly.

The primary markets for wood pulp were the United States ($673.8 million), Japan ($290.2 million) and South Korea ($227.1million). Pulp exports to all three markets increased by 26.3%, 24.2% and 34.3%, respectively. O.s.b. was primarily imported by the United States, accounting for more than 90% of the total value.

The value of lumber exports dropped by 16.2% in 2000, as a result of a 17.6% decline in lumber exports to the U.S. This market accounts for 90% of Alberta lumber exports. Lumber exports to Japan declined marginally.

Major markets for forestry products were the United States ($2.1 billion), Japan ($380.7 million), South Korea ($175.7 million) and Germany ($95.3 million).

Chemicals and Chemical Products

The value of chemical and chemical product exports increased by 32.7% to $3.4 billion in 2000, as both volumes and prices rose strongly. Volumes increased significantly for polyethylene, acyclic hydrocarbons and ethylene glycol. Commodities with large price increases include styrene, acyclic ethers and acyclic hydrocarbons.

Polyethylene, Alberta's largest chemical export, benefited from higher prices and increased demand. The overall effect was a 39% increase in export value compared to 1999. The value of polyethylene exports to the United States rose 41% from $321.2 million to $452.4 million as a result of both higher prices and higher demand. Exports to China nearly doubled to $123.9 million.

Styrene exports more than doubled in 2000 to $515.5 million, entirely because of higher prices. Shipments to the U.S. almost tripled to $464.5 million, but exports to South Korea and Taiwan declined sharply. Exports of acyclic ethers increased by 27.7% to $395.4 million, as prices increased by about 70%. All of these exports were destined for the U.S.

Exports of urea rose 6% to $359.4 million, as volumes increased by 10%. In 2000, the U.S. accounted for 92% of Alberta's urea exports. Exports of ethylene glycol, acyclic hydrocarbons and artificial filament tow (for cigarette filters) increased by more than 15%, because of increased demand. China, the U.S. and South Korea are the largest markets for ethylene glycol. China accounts for most of the filament tow exports, while the U.S. is the only market for acyclic hydrocarbons.

Major markets for chemicals and chemical products were the United States ($2.6 billion), China ($354.5 million), South Korea ($87.8 million) and Taiwan ($57.7 million).

Electrical and Electronic Equipment

Since 1995, Alberta's exports of electrical and electronic equipment have more than quintupled to a value of $4.6 billion of commodity exports. These exports increased by 118.7% from 1999's level of $2.1 billion, mainly because of a huge increase in exports of switching equipment, but also because of continued growth in transmission apparatus and a number of other electronic products. As a result, this industry became Alberta's largest manufacturing export industry in 2000. Telecommunications related products made up the majority of these exports, in particular, transmission apparatus and its parts ($1.8 billion) and telephone systems and apparatus ($2.0 billion).

The United States accounted for $4.2 billion or 91% of Alberta's electrical and electronic equipment exports, with more than half of that going to the state of New York. Huge growth in exports of transmission equipment and switching apparatus caused the large increases for the U.S. and New York. Other major destinations include Chile with $48.9 million, the U.K. $48.7 million, Taiwan $40.2 million, and Australia $37.6 million.

Machinery

After declining sharply in 1999, exports of machinery products rebounded in 2000. In that year, they were 43.3% higher than in 1999 at $879.7 million, mostly as a result of strong demand for oil and gas field equipment. Exports to the U.S. increased by 43.6% to $565.9 million, mainly because of strong growth in exports of hydraulic power engines, machinery for the treatment of materials by means of changes in temperature, air and gas compressors and pumps. In 2000, exports of oil and gas field equipment to Russia and Venezuela rose very strongly to over $40 million for each country.

While the United States accounted for 64% of machinery exports, other major markets included Russia, Venezuela, the United Kingdom, the United Arab Emirates, Australia, Cuba and China (each importing more than $10 million).

Refined Petroleum & Coal Products

Exports of refined petroleum and coal products were valued at $797.6 million, an increase of 91.3% over 1999. This increase was the result of higher prices and higher volumes, primarily of diesel fuel and fuel oil.

Petroleum oils (such as diesel fuel and fuel oil) accounted for 82% of the industry's total exports. The United States accounted for 99.8% of all refined petroleum and coal product exports.

Alberta Exports by Region and Country

The United States is Alberta's largest export market, accounting for 88.5% of international exports, up from its 1999 market share of 84.0%. Exports to the United States increased a very strong 68.5% in 2000 to $49.0 billion, led by gains in oil and gas exports, although large increases in other top exports to the U.S. also contributed to this growth.

Canadian exports to the U.S. rose at a slower pace of 16.5% to $333.8 billion, due largely to lower export growth in automotives - the nation's top export. Oil and gas exports from Alberta contributed considerably to Canada's increase and helped bring Alberta's share of Canadian exports to the U.S. to 14.7%, up from 10.1% in 1999.

Alberta's exports to non-US countries increased 14.6% to $6.3 billion in 2000 as exports of wheat, barley and oil and gas field machinery rebounded after declines in 1999, and as wood pulp and meat exports continued to climb. Canadian non-U.S. exports were also up, growing 12.5% in 2000.

Most of Alberta's major non-U.S. markets imported more from Alberta in 2000 than the year before. Iran, China and Mexico showed particularly high import growth, more than 30%. Of the other major markets, only the Netherlands and Taiwan decreased their Alberta imports while Japanese imports remained about the same.

- **Japan** was Alberta's second largest export market, making up 2.4% of Alberta exports, down from 3.8% in 1999. The value of goods exported to Japan remained unchanged from 1999 at $1.3 billion.

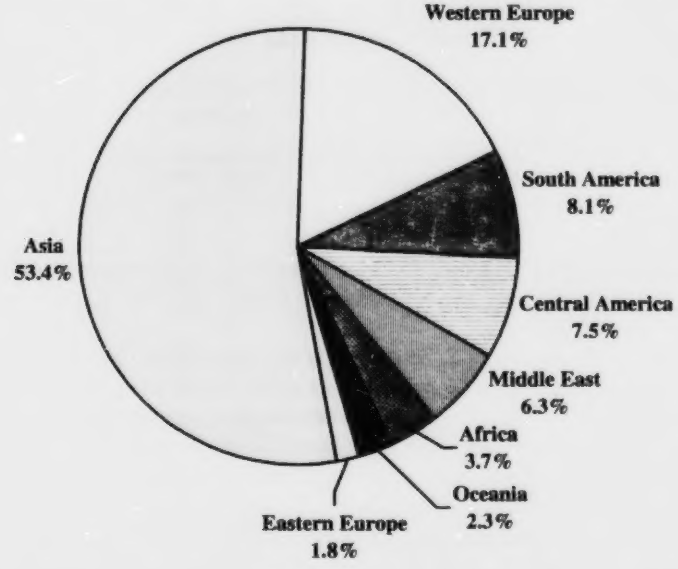
- **China** increased its Alberta imports by 32.2% to $741 million in 2000, making the country Alberta's third largest market.

- **South Korea** remained Alberta's fourth largest export market as Alberta exports to the region increased 8.4% to $544 million.

- **Mexico,** Alberta's fifth largest export market, experienced growth of 42.1% in Alberta exports to $348 million - the third largest increase of all major export markets.

- **Taiwan** imported $219 million worth of goods from Alberta, a decline of 6.4% from 1999, but remained Alberta's sixth largest market.
- Exports to the **United Kingdom** grew 9.0% to $195 million.
- **Italy** increased its imports of Alberta goods by 14.7% to $191 million from $166 million in 1999.
- **Iran** moved up two spots to become Alberta's ninth largest export market, after a 57.4% increase in its Alberta imports. This represents the second largest increase in Alberta's major markets after the United States.
- **Germany** replaced the Netherlands as Alberta's tenth largest export market after exports moved up 12.1% to $155 million.

Alberta Exports to Non-U.S. Regions, 2000



Total Value of Exports $6.3 Billion

- ***Asia*** is Alberta's second largest regional market with 6.1% of the province's international exports. In 2000, Alberta increased its exports to the region by 8.2% to $3.4 billion.
- Exports to ***Western Europe***, Alberta's third largest regional market, increased by 11.4% in 2000 to $1.1 billion.
- ***South America*** maintained its position as Alberta's fourth largest regional market with Alberta exports to the area increasing 40.9% from $364 million in 1999 to $513 million in 2000.

- ***Central America***, which includes Mexico and the Caribbean, increased its imports from Alberta by 37.8% to $477 million. In the past five years (1996-2000), Central America has been Alberta's second fastest growing regional market after the US, with exports growing 63.4%.
- Exports to the ***Middle East***, Alberta's fifth largest market, grew 39.2%, from $285 million in 1999 to $397 million in 2000.
- Alberta's exports to ***Africa*** fell for the third straight year, by 2.4% to $232 million, making it the only region to reduce its Alberta imports in 2000. Africa is Alberta's sixth largest market.
- ***Oceania*** imported $144 million worth of goods from Alberta in 2000, a 1.6% increase from 1999.
- Exports to ***Eastern European*** countries increased sharply by 98.6% to $112 million in 2000 – the highest export growth of all regions. Despite this, the region remained the smallest market for Alberta exports.

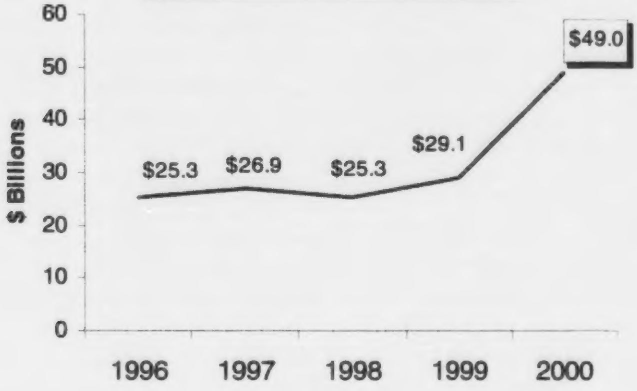
United States of America

In 2000, Alberta's exports to the United States increased 68.5%, higher than the 16.5% increase in Canadian exports. Over the last five years, the United States increased its imports of Alberta goods by 93.8%, compared to a 59.8% gain in imports from Canada. Total Alberta exports were worth $49.0 billion in 2000, accounting for 14.7% of the $333.8 billion exported to the U.S. from Canada, up from 10.1% in 1999.

Alberta Exports to the U.S.



Strong export growth to the United States occurred for the following reasons:

- Natural gas and crude oil exports jumped 86.3% from 1999 levels due largely to higher prices. Together, these commodities accounted for 65.9% of Alberta's exports to the United States.
- Widespread increases in non-energy exports, especially in manufactured goods such as telecommunication and oil and gas field equipment.

In 2000, Alberta exports of natural gas grew by $7.7 billion or 79.9% while exports of crude oil rose by $7.2 billion or 94.2%. Combined, crude oil and natural gas accounted for three-quarters of the increase in Alberta's exports in 2000. Alberta was responsible for 86.4% of Canada's natural gas exports to the United States and 77.0% of its crude oil exports.

The significant upswing in crude oil and natural gas exports was mostly due to higher commodity prices although volumes also rose strongly. Volumes of natural gas shipped increased 3.3% in 2000 and average prices 74.2%. For crude oil, shipped volumes increased 20.1% and the average price 61.8%.

The other top commodities from this province that showed strong export growth to the United States in 2000 were:

- telephone switching apparatus, up from $63.1 million in 1999 to $1.4 billion because of higher volumes.
- propane up 261.0%, due to price and quantity increases, to $777.6 million.
- styrene, up 191.5% to $464.5 million as prices and volumes rose.

- petroleum oils (other than crude, e.g. diesel fuel/heating oil), up 103.8% to $655.1 million from upward price and quantity movement.
- transmission apparatus for radio-telephony increased 63.3% to $1.8 billion, driven by higher quantities.
- coniferous (softwood) chemical wood-pulp rose 23.8% to $554.7 million, almost entirely because of price increases.

The largest drop in export value among Alberta's top exports was in lumber, down 18.0% to $613. 2 million. Lower prices were the main cause of the decrease, although lower volumes contributed as well. Exports of oriented strand board also declined, by 14.7% to $371.5 million, because of lower prices and volumes.

Top U.S. States

In the next section, exports to the major states in the U.S. will be discussed. It is important to note that exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. Appendix D includes a breakdown of exports by state.

Alberta's largest five trading partners in the U.S. were:

- New York, with Alberta imports rising strongly by 90.3% to $7.8 billion. Natural gas imports increased 77.8% to $5.2 billion. Telecommunication imports rose even more strongly, e.g. switching equipment rose from $58.2 million in 1999 to $1.1 billion in 2000 and transmission equipment doubled to $857.3 million.
- Washington, with a 59.0% increase to $6.3 billion. Of this total, energy products, mainly natural gas, make up about $5.4 billion. However, most of these exports are in transit to California or other states. Of the non-energy products, the largest is beef, totaling about $250 million.
- Illinois. Most of the 88.8% rise to $5.5 billion was due to crude oil exports, which totaled $4.8 billion in 2000. Some of this crude oil is in transit. Major non-energy imports include petro-chemicals and telecommunication equipment (up very strongly in 2000) and furniture.
- Minnesota's imports from Alberta rose 84.6% to $5.4 billion. Energy products, mostly crude oil in transit, accounted for $4.8 billion of the total. Other significant imports include petroleum oils (e.g. diesel fuel and heating oil), petro-chemicals and lumber.
- Tennessee imported $3.0 billion in 2000, up 84.6% from 1999. Natural gas imports totaled $2.7 billion, followed by telecommunication equipment at more than $180 million (up from about $10 million).

Although California only ranks as the eighth largest state at $1.8 billion (up 19.4%), its imports are seriously understated, as almost no energy products were attributed to the state. Its largest reported imports are petro-chemicals (over $400 million), telecommunication equipment (over $350 million), beef and wood products.

Asia

Asia formed Alberta's second largest regional market, accounting for 6.1% of exports and holding three of the province's top five export markets in 2000. Exports to Asia increased for the second straight year, by 8.2% to $3.4 billion from $3.1 billion in 1999, mostly as a result of strong growth in exports of wood pulp and ethylene glycol. However, over the last five years, exports to the region have actually declined by 8.2% from $3.7 billion in 1996.

Exports from Canada to Asia rose 12.0% in 2000, but have fallen 13.4% since 1996. Alberta made up 17.2% of these exports in 2000.

A 32.2% increase in exports to China, Alberta's third largest export market, was the major force behind higher Asian exports in 2000. Meanwhile, exports to Alberta's second largest market, Japan, remained unchanged at $1.3 billion. Exports to Taiwan fell 6.4%, which is consistent with the downward trend in exports to the country since 1995. All other major Asian markets increased their imports of Alberta goods in 2000, including South Korea with 8.4% growth, Indonesia (4.5%) and, to a lesser extent, Hong Kong (0.8%).

In recent years, India has re-emerged as a market for Alberta exports, growing 72.0% in 2000 and almost doubling over the last five years.

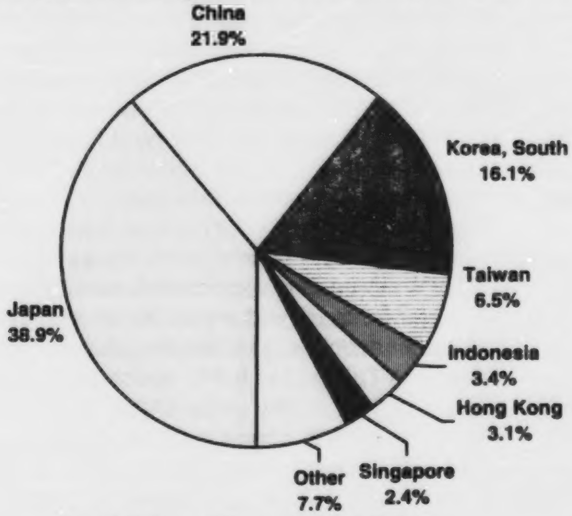
Alberta Exports to Asia, 2000



Total Value of Exports $3.4 Billion

Japan

Japan was Alberta's second largest export market after the United States in 2000, making up 38.9% of the province's Asian exports. The value of Alberta exports to Japan remained largely unchanged at $1.3 billion in 2000, increasing by less than $300,000, compared with 1999. Over the same period, the value of Canadian exports increased 7.0% to $8.9 billion, driven by higher exports of lumber and wood pulp. The increase in both Alberta's and Canada's exports was the first since 1997, the same year Japan entered a recession which lasted through 1998, and was followed by a period of very slow economic growth. Alberta accounted for about 15% of Canada's exports to Japan in 2000.

Over the last five years (1996-2000), Alberta exports to Japan fell by 20.4%, failing to recover from a sharp 21.2% export decline in 1998. Canada's exports dropped by a slightly lower rate of 19.7% over the same five-year period.

Non-coniferous (hardwood) chemical wood pulp replaced coal as Alberta's largest export to Japan. Exports of this commodity grew by 26.8% to $180.7 million as price increases made up for lower volumes.

Japan's coal imports from Alberta decreased by 41.1% to $170.1 million from $288.9 million in 1999. Over the last five consecutive years coal exports have fallen due to lower volumes and prices, although in 2000 the decline was mostly price related. While exports of coal accounted for 22.4% of Alberta's exports to Japan in 1996, they only accounted for 12.9% of exports in 2000.

Canola remained Alberta's second largest export to Japan in 2000 despite decreasing 17.2% to $173.8 million, a result of lower prices and quantities. Other major exports included wheat, which fell 7.6% to $83.0 million because of lower volumes, coniferous (softwood) chemical wood pulp (up 16.9% to $69.4 million) and lumber (down 3.1% to $68.2 million). Exports of pork and beef rose strongly.

China

China maintained its position as Alberta's third largest market in 2000, capturing 21.9% of the province's exports to Asia. Exports were valued at $740.6 million, up 32.2% from $560.2 million in 1999. Exports from Canada to China, of which 22.4% were from Alberta, grew at a similar rate (31.1%).

From 1996 to 2000, China increased its imports of Alberta goods by 8.9% and its imports of Canadian goods by 15.1%.

Higher chemical exports accounted for most of Alberta's export growth to China in 2000. Exports of ethylene glycol, which more than doubled to $132.0 million, and polyethylene, which rose 80.7% to $123.6, became the two largest Alberta commodities exported to China. Strong export growth of artificial filament tow used for cigarette filters (up 36.5%), sulphur (28.5%), wheat (104.7%), barley (80.6%), bovine hides and skins (100.8%) and chemical coniferous wood pulp (81.9%) also contributed to higher exports in 2000.

Exports of canola, the largest shipment in 1999, fell 16.6% to $113.0 million in 2000, a result of both lower prices and quantities. Although this represents the second consecutive year of decline, exports of this commodity were up significantly from $2.5 million in 1996.

Between 1999 and 2000, wheat exports more than doubled to $34.3 million and barley exports grew by 80.6% to $32.8 million, but both have fallen significantly since 1996.

South Korea

Representing 16.1% of Alberta's exports to Asia, South Korea was Alberta's fourth largest international market and third largest Asian market in 2000. Exports to the country grew 8.4% to $543.9 million in 2000 from $501.7 million in 1999. Exports from Canada to South Korea rose an even higher 13.2%. Nearly a quarter of Canada's exports to South Korea came from Alberta.

Between 1996 and 2000, Alberta increased its exports to South Korea by 8.4%, fueled by a steady rise in chemical wood pulp exports, while exports from Canada fell 20.6% largely because of declining coal shipments.

Non-coniferous (hardwood) chemical wood pulp was Alberta's largest export to South Korea for the second straight year, accounting for 29.8% of exports and rising 12.3% to $162.1 million in 2000, as higher prices more than offset the decline in quantities. Coal remained the second largest export despite falling 36.4% to $79.5 million in 2000, followed by ethylene glycol, rising 10.2% to $55.2 million.

Semi-chemical wood pulp exports, which more than tripled to $41.8 million from $12.7 million in 1999, contributed substantially to export growth in 2000.

Taiwan

Despite a 6.4% decrease in its Alberta imports to $219.1 million in 2000, Taiwan remained Alberta's 4th largest Asian and 6th largest overall market. By comparison, Taiwan was Canada's 14th largest overall market, with Canadian exports growing 2.0% in 2000. Alberta accounted for about one fifth of Canada's exports to Taiwan.

Since 1996, both Alberta's and Canada's exports to Taiwan have fallen 19.0%.

Alberta's major exports to Taiwan include petro-chemicals, wood pulp and telecommunication equipment.

Due entirely to lower volumes, ethylene glycol, the top export to Taiwan, was down by nearly one-half to $32.5 million, greatly contributing to the overall export decline in 2000.

Semi-chemical wood pulp exports shot up 54.3% to $34.3 million, driven mostly by higher prices, and became the second largest export to Taiwan. Exports of telephone sets fell significantly, by 74.3% to $20.1 million. Styrene and bovine hide and skins exports also declined, down 57.0% to $12.9 million and 14.6% to $18.1 million, respectively

Indonesia

Indonesia formed Alberta's 5th largest Asian market and 15th largest international market in 2000, making up 3.4% of Alberta's exports to Asia. Alberta exports to Indonesia increased by 4.5% in 2000 to $114.6 million, while exports from Canada grew by 25.2%. Of these Canadian exports, 17.3% were from Alberta in 2000.

Since 1996, Alberta's exports to Indonesia have fallen by 47.2%, compared to a 27.1% decrease in Canadian exports after failing to rebound from the large drop in 1998, the same year Indonesia was in a deep recession.

Both lower prices and volumes pulled wheat exports down 2.2% to $45.3 million. Wheat was the largest export to Indonesia and represented 39.5% of Alberta exports in 2000, but has fallen steadily from 1996 levels, when the commodity represented 51.7% of exports.

Exports of ethylene glycol, Alberta's second largest export to Indonesia, grew 13.5% to $24.6 million in 2000, but was down by half from 1996 levels. Coniferous (softwood) chemical wood pulp, was up from $1.3 million to $5.0 million in 2000, while artificial filament tow (used for cigarette filters) rose from $0.4 million to $2.6 million.

Hong Kong

With Alberta imports of $105.5 million, Hong Kong remained Alberta's sixth largest Asian market, but fell from 15th to 19th largest overall market in 2000. Hong Kong accounted for 3.1% of Alberta's exports to Asia, which is significantly higher than its 2.5% share in 1996.

Alberta increased its exports to Hong Kong by a modest 0.8% in 2000 and by 12.9% between 1996 and 2000. In contrast, exports from Canada grew 23.2% in 2000, but were largely unchanged over the last five years. Alberta was responsible for 8.2% of Canadian exports to Hong Kong in 2000, the lowest share among the province's major Asian markets.

The value of Alberta's largest export to Hong Kong, artificial filament tow (used for cigarette filters), fell by 10.4% to $17.7 million in 2000. Over the last five years, exports of artificial filament fell by almost half, declining in each year since 1997 because of lower prices and volumes shipped. The commodity went from representing 40.0% of exports in 1996 to 16.8% of exports in 2000.

Meanwhile, exports of the next four largest commodities – telephone sets, nickel oxides, parts of electronic apparatus for line telephone, and polyethylene - each increased significantly from both 1999 and 1996 levels. Telephones, which almost doubled to $13.2 million in 2000, became Alberta's second largest export to Hong Kong.

Western Europe

Western Europe was Alberta's third largest regional market in 2000. The region increased its Alberta imports by 11.4% to $1.1 billion and its Canadian imports by 14.6% to $19.3 billion in 2000. Growth in Alberta imports was mainly the result of large increases for nickel and wood pulp. The improvement in Alberta exports erases the 9.8% decline in 1999, a year in which exports reached their lowest levels since 1994. Alberta accounted for 5.6% of Canadian exports to Western Europe in 2000, the lowest share of all regions.

Over the 1996 to 2000 period, Canada's exports to Western Europe climbed by 14.9%, fuelled by a 40.5% increase in exports to the United Kingdom. Over the same period, Alberta exports fell by 1.3%, a result of lower exports to the United Kingdom, Germany, Belgium, Norway and the Netherlands.

The United Kingdom, which imported 9.0% more from Alberta in 2000 than in 1999, maintained its position as Alberta's top export market in Western Europe, capturing 18.0% of the province's exports to the region in 2000.

Italy and Germany also increased their Alberta imports in 2000 and remained the province's second and third largest markets, respectively. Exports to Belgium and France rose strongly in 2000, but exports to the Netherlands declined.

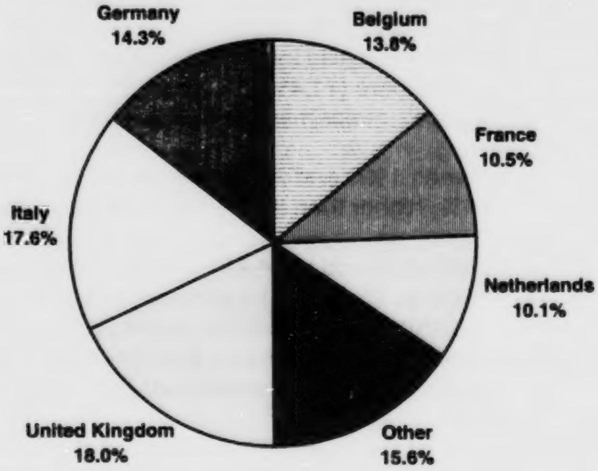
Alberta Exports to Western Europe, 2000



Total Value of Exports $1.1Billion

United Kingdom

The United Kingdom (U.K.) was Alberta's largest market in Western Europe in 2000, and seventh largest overall. Alberta's exports to the U.K. increased by 9.0% to $195.5 million, up from $179.4 million in 1999, while Canada's exports to the U.K. grew by 20.4%. Alberta was responsible for 3.6% of the $5.4 billion exported to the U.K. from Canada in 2000.

The U.K. was importing less from Alberta in 2000 than it was in 1996. Over this period, Alberta's exports to the U.K. fell 20.6%, largely because of sizeable exports of used aircraft in 1996, but none in 2000. Canada's exports to the U.K. climbed 40.5%, boosted by higher exports of machinery and aircraft.

In 2000, wheat exports, valued at $26.8 million, led all other commodities exported to the U.K. for the second consecutive year, despite declining 8.2% from 1999 levels. Semi-chemical wood pulp and nickel, Alberta's second and third largest commodity exports, grew by 198.2% and 160.1% respectively, as a result of both price and volume increases.

Exports of coal shrunk for the second straight year, by 31.0% to $14.4 million. Coal has fallen from being Alberta's largest export to the U.K. in 1996 to the fourth largest export in 2000. Exports of parts for telephone equipment also decreased, by 13.3% to $12.5 million in 2000, after five consecutive years of growth.

Italy

With exports totaling $190.8 million in 2000, Italy remained Alberta's eighth largest international market and second largest Western European market, making up 17.6% of Alberta exports to the region. Alberta exports to Italy increased by 14.7% in 2000, recovering from a 5.3% decline in 1999. Exports from Canada also increased in 2000, but by a higher rate of 20.2%. Italy had the highest share (11.4%) of Canadian exports coming from Alberta among the province's major markets in the region.

Between 1996 and 2000, exports from Alberta to Italy increased by a strong 75.1%, higher than the 26.6% increase in Canadian exports.

Nickel continued to be Alberta's largest export commodity to Italy in 2000, making up 43.1% of the province's exports. Italy imported $82.2 million worth of nickel from Alberta in 2000, up 24.5% from 1999. The main cause of this increase was a 47.7% rise in nickel prices, which more than compensated for lower volumes. Italy accounted for 36.5% of Alberta's international nickel exports in 2000.

Non-coniferous (hardwood) chemical wood pulp and semi-chemical wood pulp made up another 31.5% of Alberta's exports in 2000. Higher prices and volumes caused exports of non-coniferous chemical wood pulp to grow by more than half to $32.7 million, while lower volumes pulled semi-chemical wood pulp exports down 7.7% to $27.5 million. Wheat fell by 36.8% to $6.2 million due to both lower quantities and prices.

For the first time ever, Alberta exported turbo-propellers to Italy worth $6.7 million, making the commodity Alberta's fifth largest export to that country in 2000.

Germany

Germany, the region's largest economy, accounted for 14.3% of Alberta exports to Western Europe in 2000 and maintained its position as the province's third largest market in the region. The value of Alberta exports to Germany increased by 12.1% to $155.4 million in 2000. Canada's exports to Germany grew at a considerably higher rate of 31.5% over the same period. Alberta made up 5.2% of the $3.0 billion exported from Canada to Germany.

Despite higher exports in 2000, the value of exports to Germany from both Alberta and Canada has declined by about 6.5% since 1996.

Wood pulp exports accounted for 61.0% of Alberta exports to Germany and greatly contributed to total export growth in 2000. Shipments of non-coniferous (hardwood) chemical wood pulp, Alberta's largest export to Germany, increased 29.7% to $35.1 million, while semi-chemical wood pulp exports grew 43.8% to $33.1 million and coniferous (softwood) chemical wood pulp by 32.9% to $26.6 million. The increase of all three commodities was mainly volume related.

Other major exports in 2000 included telephone transmission apparatus (valued at $9.9 million), artificial body parts ($7.6 million) and carbon ($5.2 million).

Belgium

In 2000, Belgium accounted for 13.8% of Alberta exports to Western Europe, making it the province's fourth largest market in the region. Alberta exports to Belgium grew 32.3% to $149.4 million in 2000, from $112.9 million in 1999. Canadian exports to Belgium increased by a much lower rate of 7.2% over the same period. 7.6% of Canadian exports came from Alberta.

Alberta's exports to Belgium fell 16.3% over the 1996 to 2000 period, after failing to recover from a steep decline in 1997. Exports from Canada grew by 31.4% over the same period.

Non-coniferous (hardwood) chemical wood pulp became Alberta's top export to Belgium, more than doubling to $37.4 million in 2000 and accounting for one-quarter of Alberta exports to Belgium. Exports of nickel climbed a substantial 178.7% to $35.6 million, becoming the province's second largest export to Belgium. Larger volumes and, to a lesser extent, higher prices contributed to the large increase in export values of both commodities.

Polyethylene dropped from being Alberta's largest export to Belgium in 1999 to its third largest in 2000, as exports fell 12.6% to $27.6 million over this period. Coal exports also fell sharply, by 37.5% to $9.3 million. Lower volumes were the main causes of both declines.

France

France became Alberta's fifth largest market in Western Europe after increasing its Alberta imports by 53.8% to $114.1 million in 2000. The country accounted for 10.5% of Alberta exports to Western Europe. Canada increased its exports to France by a modest 1.2% to $1.8 billion, of which 6.4% was from Alberta.

Alberta exports to France doubled between 1996 and 2000, while Canadian exports grew by only 6.4%.

Alberta's export growth to France in 2000 was driven largely by an 84.3% increase in semi-chemical wood pulp exports. This commodity accounted for $44.9 million or 39.3% of total exports, making it Alberta's largest export to France in 2000. Exports of nickel also contributed to the increase, growing 86.8% to $17.6 million. Higher commodity prices and larger volumes were responsible for both increases.

The value of horse meat shipments, the third largest export to France, fell 8.5% to $16.5 million as both prices and volumes decreased. Non-coniferous (hardwood) chemical wood pulp was not shipped in 1999, but became Alberta's fourth largest export to the country, valued at $5.9 million, in 2000.

South America

South America was Alberta's fourth largest and second fastest growing regional market in 2000. Exports to the region increased 40.9% from $363.9 million in 1999 to $512.8 million in 2000, mostly due to high growth in Chile, Venezuela and Argentina. Commodities registering strong increases include wheat, telecommunication equipment and used aircraft. Exports from Canada rose by 11.7% over the same period. Alberta's share of Canadian exports to the region was 18.3%.

Since 1996, Alberta exports to South America have risen 10.8%, despite falling between 1996 and 1998, while Canadian exports have dropped 11.1%.

Brazil remained the province's largest market in the region, making up 23.0% of the region's Alberta exports in 2000. Chile was close behind with 22.8% of exports followed by Venezuela at 20.9%. Together, these three countries accounted for two-thirds of Alberta exports to the region.

Of all South American countries, Argentina and Uruguay experienced the highest percentage growth in Alberta exports between 1999 and 2000. Exports to Argentina more than doubled to $59.9 million, while exports to Uruguay grew 174.7% to $2.8 million.

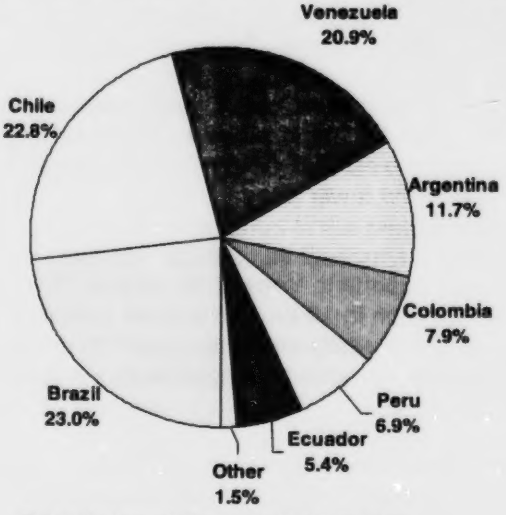
Alberta Exports to South America, 2000



Total Value of Exports $513 million

Brazil

Alberta exports to Brazil were valued at $117.8 million in 2000, placing the country as Alberta's largest market in South America. While exports from Alberta to Brazil grew 8.5% in 2000, Canadian exports shrank 0.3%. Alberta accounted for 12.0% of Canadian exports to Brazil.

Since 1996, Brazil has reduced its Alberta imports by 39.9%, mainly because of lower wheat and sulphur imports, and its Canadian imports by 26.3%.

Sulphur, however, was the largest contributor to the rise in Alberta exports to Brazil between 1999 and 2000. Fueled mostly by higher prices, the value of sulphur exports rose 33.9% to $46.8 million and accounted for 39.8% of exports to Brazil.

Coal exports, which increased 2.8% to $33.0 million in 2000, accounted for 28.0% of Alberta exports to Brazil. Lower prices and quantities pulled wheat exports down 18.1% to $8.6 million in 2000, while lower volumes dragged malt exports down 20.4% to $7.2 million. Rising volumes lifted ethylene exports to $6.5 million from $2.2 million in 1999.

Chile

Chile remained Alberta's second largest export market in South America. Alberta exports to Chile climbed a considerable 52.2% to $116.7 million in 2000. Canadian exports to Chile moved up 23.7% over the same period. Alberta was responsible for just over one-quarter of these Canadian exports.

Over the 1996 to 2000 period, Alberta exports to Chile grew by 62.0%, substantially higher than the 9.8% growth in Canadian exports.

Electrical parts for telephones replaced coal as Alberta's top export to Chile in 2000. With exports valued at $35.4 million, up from $0.14 million in 1999, this commodity accounted for 30.3% of Alberta exports to Chile.

While coal made up 46.3% of Alberta exports to Chile in 1999, it only accounted for 21.4% of exports in 2000. Exports of coal fell from $37.8 million in 1999 to $25.0 million, because of lower quantities shipped.

Although telephone transmission equipment was not exported in 1999, it accounted for $12.6 million or 10.8% of Alberta exports in 2000. Exports of wheat were also up, by 68.7% to $11.8 million, as larger volumes more than made up for lower prices.

Venezuela

Alberta exports to Venezuela jumped 79.8% to $107.3 million in 2000, from $59.6 million in 1999. Venezuela remained Alberta's third largest South American market, with about one-fifth of the province's exports to the region. The 2000 increase pushed Alberta exports to Venezuela 77.3% above 1996 levels.

Canadian exports to Venezuela have grown at considerably lower rates of 24.5% between 1999 and 2000, and 8.3% between 1996 and 2000. Roughly one-fifth of Canadian exports to Venezuela in 2000 came from Alberta.

The strongest export growth occurred in machinery, mostly for oil and gas fields. The value of all machinery exports rose more than fourfold in 2000. The largest gain was in parts for machinery with individual functions, which rose from $1.3 million in 1999 to $12.2 million in 2000, making the commodity Alberta's third largest export to Venezuela.

Wheat and durum wheat, which accounted for 71.3% of Alberta exports to Venezuela in 1999, declined to 45.0% of exports in 2000. This occurred despite a 5.4% gain in wheat exports and a 32.9% increase in durum wheat exports. Nevertheless, wheat and durum wheat remained the first and second largest Alberta export to Venezuela in 2000.

Central America, Mexico and the Caribbean

The Central America region, which includes Mexico and the Caribbean, remained Alberta's fifth largest export market in 2000. Alberta exports to the region were valued at $477.1 million, up 37.8% from $346.3 million in 1999.

The main cause of the increase was a 42.1% rise in exports to Mexico, Alberta's largest market in Central America with 72.9% of Alberta exports in 2000. A large upswing in beef exports contributed to higher Alberta exports to the region.

Cuba was the second largest market in the region, making up $54.4 million or 11.4% of Alberta exports, followed by Guatemala with $38.2 million or 8.0% of exports.

Since 1996, growth in Alberta exports to Central America was 63.4%, higher than for any other non-U.S. region. This was mostly the result of higher exports to Mexico over this period.

Canada's exports to Central America grew at 44.3% over the last five years, and 9.4% since 1999. Alberta accounted for 15.9% of Canada's exports to Central America in 2000.

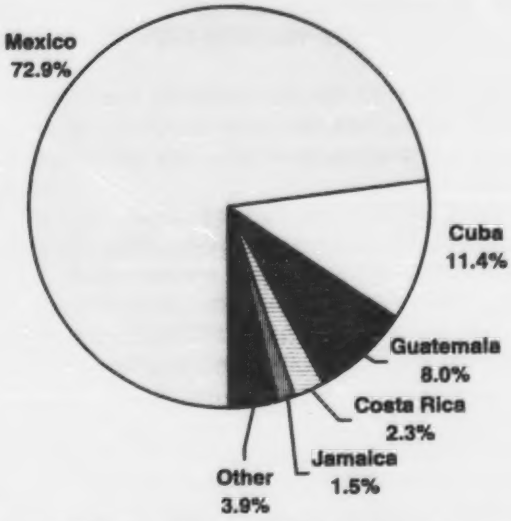
Alberta Exports to Central America, 2000



Total Value of Exports $477.1 million

Mexico

Mexico is Alberta's largest Central American market and fifth largest international market. The country increased its imports of Alberta goods by 42.1% to $347.9 million in 2000, compared to a 28.5% increase in its Canadian imports, of which 18.0% were from Alberta. This was the ninth year in the last ten that Mexico increased its Alberta imports. The exception was in 1999, when exports declined 14.6%. Alberta exports to Mexico have more than doubled since NAFTA was implemented in 1994.

Since 1996, exports to Mexico from Alberta have grown 64.1%, driven by a steady increase in beef exports between 1996 and 1999 and a sharp increase in 2000. Over the same period, Canadian exports also grew strongly, by 58.9%, due largely to higher vehicle exports.

The main cause of higher Alberta exports to Mexico in 2000 was a more than tripling of boneless beef exports. Boosted by larger export volumes, exports of this commodity reached $97.0 million in 2000, up from $31.4 million in 1999, making it Alberta's top export to Mexico.

Canola was the second largest export to Mexico in 2000. Higher quantities more than made up for lower commodity prices, pushing the value of canola exports up 46.5% to $78.4 million.

Exports of wheat, the third largest export, reached $58.1 million in 2000, up 16.7% from $49.8 million in 1999, as quantities increased.

The above three commodities collectively accounted for 67.1% of Alberta exports to Mexico. Other major exports included sulphur (down 41.1% to $14.0 million), coniferous chemical wood pulp (up 10.7% to $12.5 million) and telephone parts (up 49.6% to $11.0 million).

Cuba

Cuba was Alberta's second largest market in Central America in 2000, accounting for 11.4% of Alberta exports to the region. Alberta exported $54.4 million worth of goods to Cuba, which represents 18.4% of Canada's exports to the country. Alberta exports increased 10.3% from $49.3 million in 1999. Over the same period, exports from Canada fell 16.5%.

Alberta exports to Cuba grew 51.1% over the 1996 to 2000 period, outpacing Canadian export growth of 12.2%.

Sulphur continued to be Alberta's top commodity export to Cuba in 2000. The value of sulphur exports climbed 24.9% to $18.6 million, due to both higher prices and quantities, and accounted for 34.2% of Alberta exports to Cuba. Exports of Alberta wheat also increased, but by a more substantial 51.2% to $7.9 million, making it the province's second largest export. Dried pea exports dropped dramatically for the second straight year, by 70.4% to $2.1 million as volumes fell sharply.

In 2000, the value of all machinery exports was $14.2 million, up 48.9% from the year prior, and made up roughly a quarter of Alberta exports to Cuba. The largest of these were machines with individual functions ($1.8 million), parts of construction machinery ($1.8 million), machine parts with individual functions ($1.5 million) and boring machinery ($1.3 million).

Guatemala

Exports to Guatemala climbed significantly in 2000, by 32.2% to $38.2 million, placing the country as Alberta's third largest market in Central America. This increase, along with the 26.4% decrease in Canadian exports to Guatemala over the same period, lifted Alberta's share of national exports to Guatemala to 31.4%, up from 17.5% in 1999.

Alberta strongly expanded its export trade with Guatemala between 1996 and 2000. Over this period, exports increased by a substantial 242.9%, while Canadian exports grew by 81.7%.

Exports of telephone parts, valued at $12.1 million, drove higher Alberta exports to Guatemala in 2000. This commodity, which was not exported in 1999, accounted for 31.6% of exports to the country. Two other commodities - telephone transmission apparatus and canola oil – were also not exported in 1999, but were valued at $1.5 million and $1.3 million respectively in 2000.

Wheat exports fell 19.0% to $18.9 million in 2000, but remained the top export to Guatemala. The commodity went from representing 80.6% of Alberta's exports to the country in 1999 to just over one-half of exports the following year.

Middle East

The Middle East imported $396.8 million worth of Alberta goods in 2000, maintaining its position as Alberta's sixth largest regional market. Alberta exports to the region increased by 39.2% from $285.1 million in 1999, significantly higher than the 11.7% growth in Canadian exports to the Middle East.

From 1996 to 2000, Alberta exports to the region were up 6.3% with higher exports in 2000 compensating for the sharp drop in 1998 and the moderate decline in 1999. Canadian exports were down 7.6% over the same period.

Iran was the largest market in the Middle East, with 46.2% of Alberta's exports to the region, followed by the United Arab Emirates with 13.8% of exports. Both of these countries substantially increased their Alberta imports in 2000.

Exports to Iraq and Saudi Arabia were particularly strong, growing 213.8% and 197.4% respectively between 1999 and 2000. Alberta exports to Yemen grew from $2.8 million in 1999 to $15.4 million in 2000.

Many of Alberta's smaller Middle Eastern markets, such as Libya and Sudan, imported fewer goods in 2000, limiting the extent of Alberta export growth to the Middle East.

Wheat accounted for over 60% of total exports to the Middle East in 2000, and was the main driver of the region's growth.

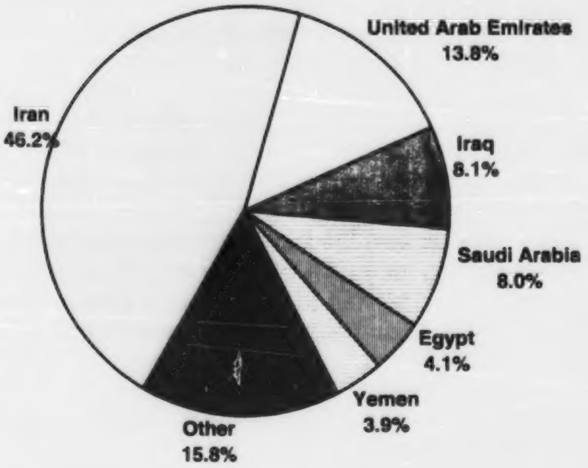
Alberta Exports to the Middle East, 2000



Total Value of Exports $396.8 million

Iran

In 2000, Iran imported more from Alberta than any other Middle Eastern country and became Alberta's ninth largest international market. Alberta exports to Iran climbed 57.4% from $116.5 million in 1999 to $183.4 million, while Canadian exports grew 21.8%. Alberta's share of Canadian exports to Iran was 28.0%.

However, since 1996 Alberta exports to Iran have increased only 8.9% compared to a 16.7% increase in Canadian exports. The province's exports continued to rebound from a 60.0% decline in 1998, caused by a sharp drop in wheat exports.

Accounting for 93.7% of exports, wheat was by far the top commodity exported from Alberta to Iran in 2000. Exports of this commodity grew 67.7% from $102.5 million in 1999 to $171.8 million in 2000. Since wheat prices declined in 2000, this gain was fueled by an 80.0% increase in quantities shipped. At 80.6%, wheat also accounted for a large proportion of Canadian exports.

Other grain commodities showed strong export growth in 2000. Barley, which was not exported in 1999, was valued at $3.7 million in 2000. Durum wheat exports doubled to $2.6 million in 2000, due to larger volumes and, to a lesser extent, higher prices.

Machinery exports fell sharply in 2000, by 58.3% to $4.1 million, mostly because many top machinery commodities in 1999 - such as dryers, laboratory equipment and heat exchange units - were not exported in 2000.

United Arab Emirates

The United Arab Emirates (UAE) remained Alberta's second largest Middle Eastern market in 2000, as exports to the country grew 55.1%, compared to a 32.4% increase in Canadian exports. With exports valued at $54.9 million, Alberta accounted for about one-quarter of Canada's exports to the UAE in 2000.

Over the period 1996 to 2000, Alberta exports to the UAE grew by 155.0% while Canadian exports increased 33.6%. With the exception of a sharp drop in 1999, Alberta exports to the UAE have risen in each year since 1994.

Wheat was also the top commodity exported from Alberta to the UAE, accounting for 41.8% of exports in 2000. Valued at $22.9 million, wheat exports gained 51.1% from $15.2 million in 1999. Higher volumes were responsible for the increase and more than compensated for lower wheat prices.

Alberta exports of hydraulic power engine and motor parts more than doubled to $4.4 million in 2000, while barley exports reached $3.7 million after not being exported in 1999.

The value of all machinery exports was $22.2 million or 40.5% of total Alberta exports to the UAE, up 35.1% from 1999.

Africa

Alberta exports to Africa, the province's third smallest regional market, declined for the third straight year, by 2.4% to $231.6 million in 2000. The decrease was largely caused by a sharp decline in sulphur exports, and occurred despite higher exports of wheat and durum wheat, Alberta's two largest exports to the region. Since 1996, Alberta exports to Africa have fallen by 2.6%.

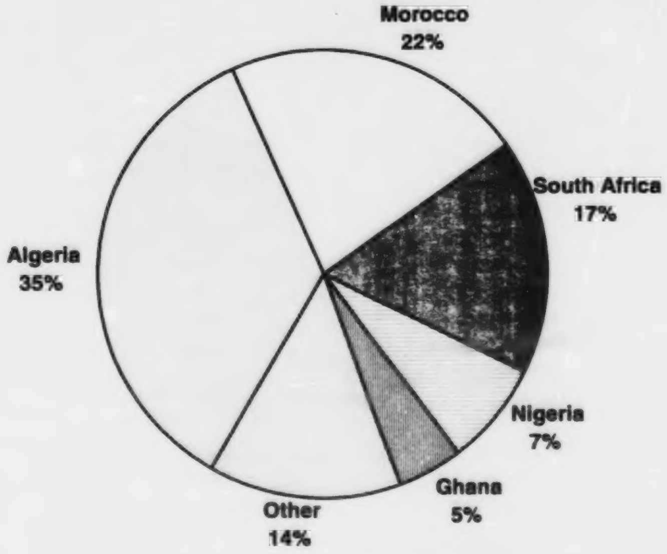
By comparison, Canada's exports to Africa grew 1.7% in 2000 and 7.3% between 1996 and 2000. Alberta's share of Canadian exports to the region was 16.7% in 2000.

Algeria, which took in 3.7% more Alberta imports in 2000 than in 1999, was Alberta's largest market in Africa and 20th largest market overall. Morocco and South Africa both reduced their Alberta imports by over 15% in 2000, but continued to be Alberta's second and third largest markets in the region. Algeria, Morocco and South Africa accounted for $81.3 million, $50.5 million and $39.6 million of Alberta exports to Africa, respectively. Together, they made up nearly three-quarters of all exports to the region.

Alberta Exports to Africa, 2000



Total Value of Exports $231.6 million

Algeria

For the fourth straight year Algeria was Alberta's largest market in Africa. Led by higher machinery shipments, exports to the country rebounded 3.7% to $81.3 million in 2000, after experiencing declines in both 1998 and 1999. Canadian exports rose 3.0% over the same period. Since 1996, Alberta exports to Algeria have grown by 15.7%, similar to the 15.9% rise in Canadian exports.

Consistent with Africa as a whole, durum wheat makes up the vast majority of Alberta exports to Algeria, accounting for 89.2% of exports in 2000, down from 96.2% in 1999. Despite higher prices, lower quantities caused exports of this commodity to decline 3.9% to $79.5 million in 2000.

The combined value of machinery exported to Algeria increased almost fourfold to $4.8 million in 2000 and made up 6.0% of the country's Alberta imports, up from 1.6% in 1999. Sorting machines for mineral substances and taps, cocks and valves, both of which were not exported in 1999, were Algeria's two largest machinery imports from Alberta in 2000.

Morocco

Alberta exports to Morocco fell 15.8% in 2000 to $50.5 million from $60.0 million in 1999. This represents the third consecutive year in which Morocco lowered its imports of Alberta goods. In contrast, higher wheat shipments raised Canada's exports to Morocco by 35.4% in 2000, dropping Alberta's share of the nation's exports to Morocco to 21.1%, from 34.0% in 1999.

Between 1996 and 2000, Alberta exports to Morocco declined 40.8%, due largely to diminishing exports of sulphur, while Canadian exports rose 23.3%.

Durum wheat became the largest Alberta export to Morocco, growing 55.5% to $27.5 million in 2000. Exports of all other wheat more than doubled to $11.0 million. Both gains were mainly the result of higher volumes. Sulphur exports, which have fallen steadily since 1997, dropped again, by 74.2% to $9.3 million in 2000, due to lower volumes.

South Africa

In 2000, South Africa maintained its position as Alberta's third largest market in the region, even though Alberta exports to the country decreased 15.1%, from $46.6 million in 1999 to $34.6 million. Canadian exports, of which 21.1% were from Alberta, fell by a modest 1.0%, .

Exports from Alberta to South Africa were up 25.9% between 1996 and 2000, compared to a 4.9% increase in Canadian exports.

As with Morocco, lower sulphur exports was the largest contributor to the decline in Alberta exports to South Africa in 2000. The value of sulphur exports dropped by 34.7% to $18.3 million in 2000 as quantities fell sharply. The commodity made up 46.2% of Alberta exports to South Africa in 2000, down from 66.2% in 1996, but still continued to be Alberta's largest export to the country.

Wheat exports to South Africa bounced back from a 47.8% decline in 1999, increasing 42.8% in 2000 to $12.5 million due largely to volume increases. The commodity was Alberta's second largest export to the country in 2000, accounting for 31.5% of exports.

Oceania

Oceania, which consists of Australia, New Zealand and other South Pacific countries, was Alberta's second smallest regional market in 2000. Alberta exports to the region grew marginally, by 1.7% to $144.1 million in 2000, and continued to recover from a sharp decline in 1998. By comparison, exports from Canada gained 15.0%. Since 1996, Alberta exports to Oceania have fallen by 11.6%, while Canadian exports have risen 9.6%.

Virtually all of Alberta exports to Oceania go to Australia and New Zealand. In 2000, Australia made up 80.8% of the province's exports to Oceania, while New Zealand accounted for another 18.3%.

Although Alberta exports to Australia were up 17.8% in 2000, a steep 33.8% decline in exports to New Zealand prevented a significant overall export increase for the region.

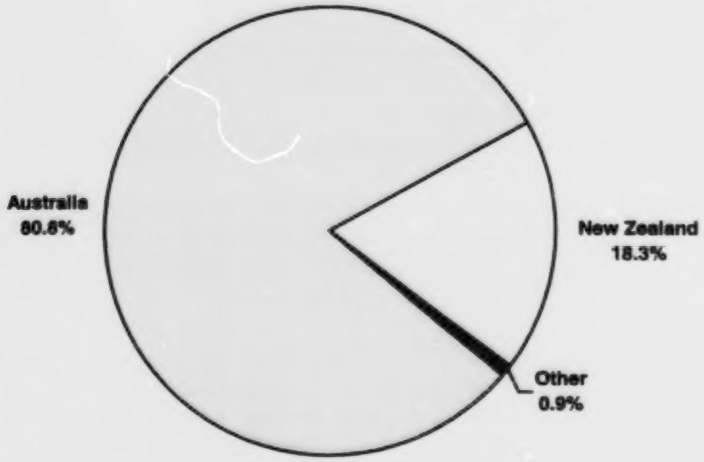
Alberta Exports to Oceania, 2000



Total Value of Exports $144.1 million

Australia

Australia is by far Alberta's largest market in Oceania. Propelled by higher exports of machinery, fertilizers and sulphur, Alberta exports to Australia grew by 17.8%, from $98.8 million in 1999 to $116.4 million in 2000. Canadian exports increased by 23.2%. Alberta's share of Canadian exports to Australia was 10.3% in 2000.

Alberta exports to Australia shrank by 6.1% between 1996 and 2000, while Canadian exports expanded 22.1%.

In 2000, urea was Alberta's largest export to Australia, accounting for 17.7% of exports, and increasing 59.9% to $20.6 million, due to both price and volume gains. Parts for telephone line systems have, over the last five years, rapidly emerged as the second largest export to Australia with exports valued at $15.4 million, up 36.3% from 1999. Sulphur continued to be a leading Alberta export to Australia. Driven by sharp volume and price increases, exports of this commodity grew by three-quarters to $15.0 million in 2000.

Other major exports included telephone switching equipment ($5.9 million), telephone transmission equipment ($5.6 million) and telephone sets ($5.5 million).

New Zealand

Alberta exports to New Zealand were reduced from $39.7 million in 1999 to $26.3 million in 2000, a 33.8% decline resulting mainly from lower wheat, ethylene polymer, helicopter and urea exports. Exports from Canada also fell in 2000, but by a lower rate of 8.2%. Alberta accounted for 14.1% of Canadian exports to New Zealand in 2000.

Between 1996 and 2000, Alberta saw its exports to New Zealand fall 19.0%, while Canadian exports decreased 15.9%.

For the second consecutive year, sulphur was Alberta's largest export to New Zealand. Higher prices increased the value of sulphur exports 9.3% to $7.6 million, despite lower quantities shipped. Ammonium sulfate became the second largest export after increasing 71.6% to $6.0 million, because of higher volumes. A large volume decline pulled wheat exports down 56.7% to $2.2 million, the lowest level since 1995.

Several top commodities showed large export declines in 2000. Ethylene polymer exports fell 51.9% to $2.0 million, urea exports were down 77.5% to $0.9 million and helicopters were not exported at all in 2000, after accounting for $4.0 million or 10.0% of exports in 1999.

Eastern Europe

In 2000, Eastern Europe experienced the highest growth in Alberta exports of all regions including the United States, but remained Alberta's smallest regional market. Led by higher oil and gas field equipment exports, Alberta exports to the region nearly doubled, growing 98.6% from $56.4 million in 1999 to $112.1 million in 2000, compared to a 5.6% increase in Canadian exports. While higher exports to Russia, Alberta's largest market in the region, was the main cause of the increase, export growth in Lithuania, Kazakhstan and Romania was also very strong. Substantial declines occurred in Poland, Hungary, Croatia, Kyrgyzstan and Slovenia.

Between 1996 and 2000, Alberta exports to the region strengthened by 3.5% while Canada's exports fell 21.3%. Alberta's share of Canadian exports to the region was 15.9%.

Russia

Russia is Alberta's largest market in Eastern Europe. Alberta exports to Russia more than doubled from $26.4 million in 1999 to $62.0 million in 2000, particularly due to increases in oil and gas field equipment. Alberta was also responsible for the 12.8% rise in Canadian exports to Russia in 2000, as exports from all other provinces fell by 9.5%. Accordingly, Alberta improved its share of Canadian exports to Russia to 32.1% in 2000, from 15.4% in 1999.

The 2000 increase, which came after three consecutive years of declines, elevated Alberta exports to Russia by 10.2% above 1996 levels. Canadian exports dropped 38.0% over the same period.

Machinery made up 71.3% of Alberta exports to Russia and represented the four top commodities exported in 2000. Distilling plants were not exported in 1999, but were valued at $10.9 million in 2000, becoming Alberta's largest export to Russia. Parts for boring machinery were the second largest export, valued at $10.6 million, up from $1.5 million in 1999, followed by parts for lifting and handling at $5.3 million, also up from $1.5 million.

Other top commodities exported in 2000 included machinery used to treat materials by a change in temperature ($5.1 million), trailers ($4.7 million), prefabricated buildings ($3.6 million) and machines with individual functions ($3.5 million).

Kazakhstan

In 2000, Alberta exports to Kazakhstan recovered from the sharp drop in 1999. As a result of higher oil and gas field equipment shipments, exports reached $12.9 million in 2000, up from $2.0 million the year before, making the country Alberta's second largest Eastern European market. Alberta accounted for over half of the $23.7 million in Canadian exports to Kazakhstan, which grew from $5.9 million in 1999.

Between 1996 and 2000, Alberta exports to Kazakhstan rose by 376.1%, compared to an 82.4% rise in Canadian exports.

Like Russia, machinery accounted for the majority (76.9%) of Alberta exports to Kazakhstan in 2000. Parts of machinery with individual functions rose from less than $15,000 in 1999 to $5.3 million, or 41.5% of exports, the year after. Other major exports were parts for boring machinery ($1.5 million), machinery with individual functions ($1.3 million) and measuring instruments ($1.2 million).

Lithuania

Lithuania, a country that typically imports very few Alberta goods, became Alberta's third largest market in Eastern Europe in 2000. Alberta exports to Lithuania were valued at $12.2 million, a major upswing from $0.8 million in 1999 and less than $100,000 in 1996.

Over 60% of Canada's $19.7 million in exports to Lithuania came from Alberta in 2000. Canadian exports to the country were up from $4.1 million in 1999 and $8.7 million in 1996.

Almost all of Alberta exports to Lithuania in 2000 were parts of machinery and equipment for heat treatment of materials. Exports of this commodity totaled $11.7 million, representing 96.0% of total exports to Lithuania.
